

METRO HOOD INFORMATION SHEET

General:

The Metro Hood is produced using 9mm MDF custom board fascia and return ends, 16mm white velvet HMR particle board top boards

All Metro Hoods are screwed together, not stapled, for maximum strength and fully lined inside in ivory or white 3 pass lining

Angle brackets can be supplied at an extra cost

Fabrics supplied by customers are to be marked right/wrong side, up/down, railroaded

Joins can be done in fabrics but we highly recommend that fabrics are railroaded regardless of texture or pattern and Complete Blinds takes no responsibility for joins.

Painted Metro Hood frames – without joins = 3600mm, over this size will require a join

Measurements:

All width and top board measurements supplied are internal unless specified.

Fabric quantities as follows;

| | |
|-------|-----------------------------------|
| Width | Hood width plus returns and 200mm |
| Depth | Fascia size plus 150mm |

Example:

2000mm hood with 100mm returns - $2000 + 100 + 100 + 200 = 2400\text{mm}$

200mm fascia - $200 + 150 = 350\text{mm}$

Therefore, a hood measuring 2000mm (L) x 200mm (H) x 100mm (Returns) requires a cut of 2400mm x 350mm

Delivery:

Manufacturing times are generally 7-10 working days depending on availability of fabric

Price includes delivery in metropolitan area

Alterations:

Light filtered / screen fabrics may require interlining, add 15% to the listed price.

All blinds for alterations will incur a minimum charge plus parts and freight + GST *

Top boards can be cut onsite - Metro area only - POA

**This is a guideline only; every application will vary and quotations may be provided for authorisation*
