

NEW NEWS AND THEN SOME MORE NEWS

Something to ponder
*When it looks like life has shut a door on you, open it again.
Remember that it's just a door. That's how they work.*

SHOCKING NEWS!!

To our valued and prized friends,
We now have to stop, take a really deep breath,
and discuss that massive elephant in the room....

Yes, that awful time has come... that horrible talk
that we have each year, the one NOBODY likes,
the one that stresses out everyone on Jan 1st....

CBC PRICELISTS 2024

So, here's what's happened.....

The team at CBC researched, analysed and then did it again, restocked the bar, shook some trees, kicked the tyres, and after some heated discussions about which one of us would hypothetically beat Thor if his hammer was actually made of ham, a final decision was made.

Supplier increases this year have been single digits in 90% of components and materials and to show our appreciation for the support we have had over the last few years from our wonderful friends out there, we are going to suck up the increases for another six months....

Yes, you read that right! No product price increases until...
wait for it..... **July 1st, 2024!**¹

¹ - A few spare parts for stock may be excluded from price freeze to cover costs

*** Also, the updated Fabric Selection Chart is now available for reference ***
Call us if you haven't already received a copy!

Introducing the RB09 Chain Winder with Guide, ideal for dual shades using Slim Profile double brackets. It pairs seamlessly with the original RB09 winder, streamlining manufacturing with consistent deductions across the range.

RB09 Chain Winder with Guide

The RB09 with Guide comes fixed, which can easily be converted to a swivel configuration. The swivel option **reduces noise and effort** when **operating at an angle**, making it ideal for **hard-to-reach blinds**. AND is optimal for installs where **furniture is blocking easy access**.

PUSH 5

PUSH 15

PUSH 1

For those who have been waiting **patiently** for Rollease Acmeda to listen to the masses and re-release a 1 channel remote for the Automate Motors, your voice has made a difference...

The NEW PUSH 1 Remote Control is coming soon!!!

CAUTION

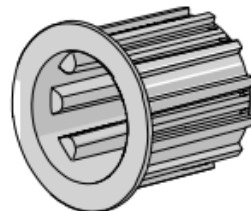

RE: Hard wired Automate motors.

The current Automate E6 & M6 ('GEN II') motors are being phased out and replaced with a 'REV' Automate version. For those pre-install cables that are sowing their oats out in the wild, please ensure you have the correct motors and do not swap these without checking that they match.

(For your peace of mind - All motorised blinds orders in our system have matching motors and cable tails allocated specifically to each blind so there is no mix-up from this end.)

BUT WAIT!! THERE'S MORE!!!

Take a look at this...

You know those really big and heavy *internal* roller blinds that come up once in a while? The ones that are really wide (way oversized) and have a really long drop? AND the cost of using the S60 tube with S60 componentry is astronomical?!

Well, you can breathe easier now 😊. This new Rollease Acmeda S60/S45 adaptor is designed to fit our standard S45 chain drives and idlers into the S60 tube so you can have security of mind knowing that roller blind deflection over a wide span² has been minimised.

How much more affordable you ask? Think over 50% less than using the previous (*and the only available option*) S60 tube and S60 component combo.... call us for the special details and you will be pleasantly surprised...

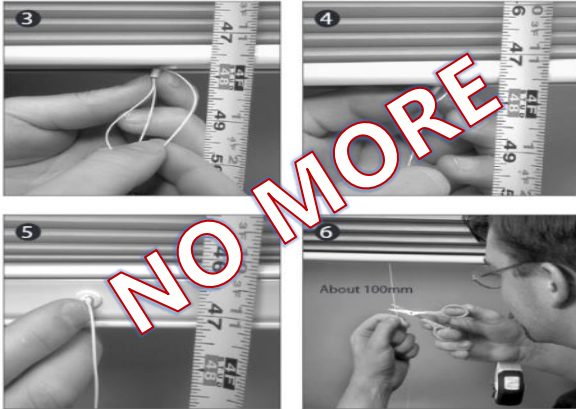

² - Max width and drop for this system is dependent on various factors.

Please contact the CBC office to ensure this system will be suitable before ordering oversized internal rollers.

IMPORTANT NOTICE:

PLEASE NOTE THAT ALL ORDERS FOR **CUSTOM** ROMANS WILL BE DELAYED UNTIL MID TO END OF OCTOBER – STANDARD ROMANS WILL CONTINUE AS NORMAL.

INCREDIBLE HONEYCOMB NEWS *for installers...*

This one is for all those installers out there who dread the thought of having to level honeycomb blinds on-site.
(yes, we do think of you and feel your pain.....)

The bottom rails of the Turnils Honeycomb blinds have been re-designed to rid you of the fiddily levelling of blinds on-site after installing. What a futon nightmare!!

No more 'hanging cords' from the bottom of the blind for the installer to level the blind.....

Introducing the new...

TTURNILS® *EASY ADJUST Levelling System...*

The **Easyrise**, **Cordless** and **Motorised** Operating systems now come supplied with a key to adjust levels to suit the window opening!

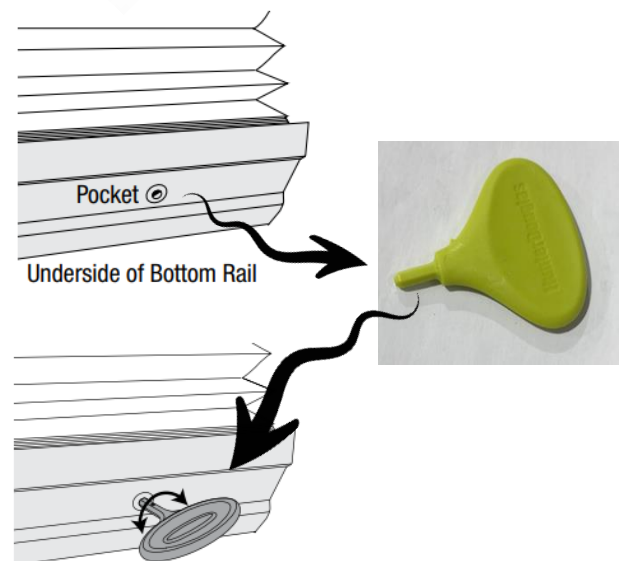

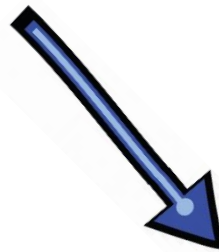

Just a quarter turn will raise or lower the bottom rail by 6mm at a time... wait... can you hear that?? The sound of relief is being heard around Adelaide.....

No need to order specially, it is an automatic standard feature. For you... the brave installers out there fighting the good fight against uneven bottom rails.....

But wait...there's more... the vegan steak knives are coming....

The Honeycomb **Classic** Operating System now has a new cordlock! (*insert fireworks here*)

A new addition to the team, the Louvolite Cordlock is stronger, faster, able to pull up small buildings and is more aesthetically pleasing to the superhuman eye – *available only in black or white....*

DON'T FORGET THE UPDATED PVC TIMBER NEWS!!!

TURNILS® Urban Woods Venetians

Replacing the Tuscany Timber range, both in looks and price, the Urban Woods range has caught the eye of those who prefer the smooth 'timber' look without the price tag. UV coated and moisture resistant and engineered to resist fading, cracking, discolouration, peeling and warping. AND washable. AND colour consistent. Apart from the usual neutral colour suspects, it's the smooth wood colours that jump out at you... light wood right through to the reddish colour.

Colours

Warm White

Alpine White

Linen

Fog Grey

Tallowood

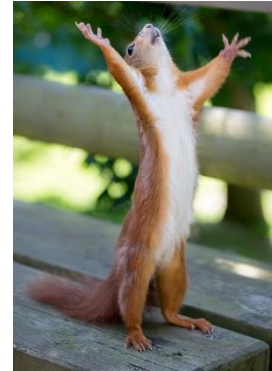

Spotted Gum

River Teak

Karri

Ironbark

AND we have price dropped this venetian to match the previous Tuscany venetian pricing!!

Some of you already are familiar with the Vertex fabric range, but for those first-timers, here's some info for you...

Vertex is an Australian owned and run company with a large range of roller fabrics at the lower end of the price groups. We currently have access to 20 fabrics made up of blockouts, light filters and screens, 13 of these are also available in vertical widths. The textures range from the standard smooth finish to the patterned styles and all come in the 3000mm widths. Many neutral shades as well as a bit of colour thrown in for ... well.... colour.....

Venus Snow

Venus Pearl

Venus Linen

Venus Dove

Venus Stone

Venus Granite

Call us. We will show. We will talk. You will be happy 😊

And now for the serious bits from our suppliers...

Hunter Douglas: Signum Blockout fabric range – discontinued, please remove from your collection
Baltic Plus – VERTICAL fabric only – discontinued (Roller fabric still current)

Uniline: A new fabric under investigation – “Sirocco” - details soon!!

Four Families: Opulence SB – discontinued, please remove from your collection

Now for the Social Pages (half a page anyway)....

Well... they finally did it...

The CBC boys formed a formidable team to join the social basketball championship! The ‘**COMPLETELY BLINDERS**’ team have gritted their teeth, wiped the sweat off their brows, tucked singlets deep into their footy shorts... and hurled themselves into the fray to represent the CBC family name with total honour against the top U12 teams in the competition. (that’s what we have been told anyway...)

THE TEAM TO WATCH OUT FOR....

The ones to beat in the social basketball scene are the intimidating ‘Basketbrawlers’ team. They will lull you into a sense of confidence... But be aware, they are lethal below knee level... Minor injuries to bodies, major shock to egos....

Go the BLINDERS!!!!

Well, that’s it for now...

Looking forward to next time! (it will be soon!!)

Ciao from the CBC team 😊

Why am I crying?!?
It’s because I was just a girl.. standing in front of a salad.. asking it to be a doughnut...
